

# Assaf Ben-Kish - Curriculum Vitae

<https://assafbk.github.io/website> | [assafbk@gmail.com](mailto:assafbk@gmail.com) | +972(0)-549982536

## Education

---

### 2022 - Present: M.Sc. in Electrical Engineering, Tel-Aviv University, Israel

- Specializing in Deep Learning and Large Language Models
- Current GPA: **99.27**

### 2018 - 2022: B.Sc. in Electrical Engineering and Computer Science, Technion, Israel

- Specialized in Machine Learning and Signal Processing
- Final GPA: **91.3** - **Magna Cum Laude**, included in the **President's honor list** and **Dean's honor list**

## Publications

---

- **DeciMamba: Exploring the Length Extrapolation Potential of Mamba**

*Assaf Ben-Kish, Itamar Zimmerman, Shady AH, Nadav Cohen, Amir Globerson, Lior Wolf, Raja Giryes.* Under review. [link](#)  
We utilize Mamba explainability techniques to investigate why Mamba's length-extrapolation capabilities are limited, and propose DeciMamba, a context extension method, which can extrapolate to sequences that are magnitudes longer than those seen during training, without requiring additional computational resources or re-training.

- **Mitigating Open-Vocabulary Caption Hallucinations**

*Assaf Ben-Kish, Moran Yanuka, Morris Alper, Raja Giryes, Hadar Averbuch-Elor.* Under review. [link](#)  
Due to their closed-vocabulary design, existing hallucination metrics and algorithms ignore many hallucinations produced by SOTA image captioning models. By leveraging recent progress in generative foundation models, we propose a unified framework for quantifying and mitigating open-vocabulary hallucinations.

- **Constant Beamwidth LCMV Beamformer**

Ariel Frank, *Assaf Ben-Kish, Israel Cohen.* EUSIPCO 2022. [link](#)

Finding a design for a Constant Beamwidth LCMV Beamformer which is simple, computationally efficient and that has significant sidelobe attenuation.

## Research Projects

---

- **Reference-Free Evaluation of Vision-Language Models** - A collaboration with Google Research (ongoing)
- **Implementing and Improving the DDPG-MP algorithm** - Final projects in Deep RL, [CRML](#) laboratory, Technion  
(i) Evaluating a robotic manipulation algorithm (ii) Improving the algorithm using Model-Based methods.

## Awards

---

- **2024 - Award of Excellence for M.Sc Students, Engineering Department, Tel-Aviv University**

## Experience

---

- **2021-2023 - Algorithms Engineer at Vayyar**

Development of Methods for Antenna Array Calibration:

Model-Based Trace Calibration and Model-Free Online Trace Calibration, Statistical Methods for Leakage Removal, Radiation Pattern Estimation, Created and Taught Vayyar's Array Calibration Course

- **2020 - 'Signals and Systems' Course Tutor at the Technion**

- **2017 and summer of 2018 - Software Developer at [Insoundz LTD](#)**

- **2014-2017 - Member of a leading R&D team at Unit 81 - The Technological Unit of the Intelligence Branch, IDF**

- Specialized in R&D in the field of digital communication and reverse engineering
- Awarded outstanding employee of the Electrical Engineering Department (out of 1000 employees)

**Programming and Software knowledge:** Python, Matlab, C, C++, Linux and open-source software, such as: Pytorch, Docker, Pybullet, FFMPEG, etc.

## Community Involvement

---

- Mentor in a "Big Brother" program for new EE students at the Technion - 2018, 2019, 2020
- Youth Movement Supervisor + Tutor of a child from a low socio-economic background - 2013
- Year of Service - The Jewish Agency, Greater New-Haven, CT, USA - 2012-2013

**Languages:** Hebrew, English - native tongue level
